SUPPLEMENT

1. There are 713,000 hectares of forest in Slovenia. Of these, 178,500 are state-owned or state-controlled, and 30,000 are in areas under military control.
2. About 100 sawmills, of all sizes, are operating and there are about 100 dumps for industrial timber.
3. Exploitation of these resources and sawing is entirely controlled by "LES", the State forestry organization. "LES" is in turn controlled by the "Commission for Timber Construction" which has made a program for the exploitation of timber resources in Slovenia.
4. At the end of July 1946 about 6,000 persons were engaged in the timber industry in Slovenia.
